

Mitt-i-ST® - a midway evaluation during specialist training

SFAM offers a voluntary evaluation of competence halfway through the five year program for specialists in general practice/family medicine: Mitt-i-ST. It consists of two of the parts in SFAM:s voluntary specialist examination – portfolio and practice visit.

The purpose is to help and support the candidate in planning the content of the remainder of the five year program by exploring needs to be achieved to achieve competence as a specialist in general practice /family medicine. Mitt-i-ST® should preferably be done in the third year, and no later than in early in the fourth year.

In many parts of Sweden Mitt-i-ST is required by the regional medical authorities as part of the training.
